

Coronavirus; supporting children & young people's wellbeing

Wellbeing tips for families:

- Talk to your children and answer their questions. Ask about what they have heard about the virus and the situation so that you can correct possible misconceptions and reassure them.
- Avoid being too immersed in media coverage. Be mindful of the number of things you are reading and watching, including social media – as this may add to worry and anxiety. Consider a few updates every day from trusted sources.
- Remember that people react differently to significant events. Some people – adults and children and young people – may feel worried, some excited, some nothing much at all. Be reassured that different reactions are normal and ok.
- If your child seems worried, it may be good to distract themselves with something that takes their mind off their worries. You might also want to set aside 10-15 minutes each day for them to talk about any worries, and to reassure them.
- Remember to keep things positive and give children and young people hope. For example, tell children and young people that now many people are working to make this better and that even though it is serious, everyone is doing their best to help people.
- Try to keep familiar routines. Well-known routines in everyday life provide security and stability.
- Do nice things together and keep active. Make a plan and suggest some regular family times where you can play games, do some exercise together, or do other things that you know most of you like. Try to find a good balance between time together, and screen time.
- Keep in good contact with family and friends (via Facetime, Skype WhatsApp etc.; following NHS guidance on 'social contact'). This will help children and young people connect with others and know that others are thinking about them. It will also reassure them that others are well.
- As a parent you may be concerned yourself. Take care of yourself and make sure you have breaks, time to relax, and ask for help from others if you need.
